

## INFECTION CONTROL TRAINING

**Working together to improve your knowledge and safety.  
Ensuring you and your team are confident and compliant  
with infection control.**

Presented by Cathy Schafer

Qualifications Cert III and IV (Radiography, DHE and A&S) in Dental, Grad Dip in OHS, TAE, DAU – Westmead Dental School.

### COURSE OUTLINE

This course will build confidence in Dental Teams by expanding their knowledge of Infection Prevention and Control ensuring they are compliant in their surgeries.

From understanding the foundations of the relevant Australian Standards and the ADA Infection Control Guidelines, the course will break down what specifically needs to be done to achieve IPC best practice.

This fun and interactive training is different to any other sort of CPD training you've attended. Sue engages the attendees, breaks down barriers and makes the topics interesting and it is suitable for the entire team.

### KEY OBJECTIVES

The aim of infection prevention and control practices is to limit or control factors influencing the spread of microorganisms and thereby the transmission of infection. The spread of microorganisms can be reduced by:

- Increase knowledge of Infection Control Practices and how to implement successfully
- Adhering to good personal hygiene practices, particularly efficient hand hygiene
- Using personal protective equipment
- The use of disposable products where appropriate (e.g. paper towels)
- Understanding efficient strategies to reprocess instruments
- Correct record keeping

### COURSE TOPICS

- Updated COVID-19 requirements
- Precautions of Infection Control
- Handling and disposal of sharps and contaminated waste
- Handwashing techniques
- PPE
- Work Health and Safety in the workplace
- Identifying problem areas in your practice
- Reprocessing of reusable instruments & Batch Control Identification
- Correct flow of the sterilisation room
- Documentation and practice protocols for infection control
- Environmental cleaning
- Maintenance of equipment including ultrasonic cleaners and autoclaves
- Documentation and mandatory signage required for infection control
